

Respiratory Syncytial Virus Genotype A/B Nucleic Acid Detection Kit (Fluorescence PCR Method)

The TianLong Respiratory Syncytial Virus Genotype A/B Nucleic Acid Detection Kit is intended for the qualitative detection and differentiation type A/B of respiratory syncytial virus nucleic acid by real-time reverse transcription polymerase chain reaction (Real-time RT-PCR) method.

It can help quick and accurate detection of respiratory syncytial virus, assist in the diagnosis and treatment of Respiratory Syncytial Virus infection patients and public healthcare management.

FEATURES

Differentiate Genotype

Individual genotype reporting of A/B of RSV, the most common disease-causing pathogen

Various Specimen

Nasopharyngeal or oropharyngeal swabs, sputum, bronchoalveolar lavage etc.

High Precision

The precision values of intra and inter Ct values are all <5%
