

## Nucleic Acid Extraction Kit For Amniotic fluid DNA Extraction

The kit is intended for rapidly extracting DNA from Amniotic fluid samples. It realizes the high-throughput processing of parallel samples. The whole operation process is safe and convenient. There is no need for organic reagent. The extracted nucleic acids are highly purified and in quantity, which can be widely used in the fields of diagnostics, genomics research, disease detection, food safety and forensic identification, etc.

### FEATURES

#### High Yield

Yields more than 2μg DNA from 5-10mL amniotic fluid samples

#### High Nucleic Acid Purity

OD260/OD280 ≥ 1.5

#### Rapid Extraction

Within 40 minutes for nucleic acid extraction

#### User-friendly

Pre-filled design enhances the efficiency of professionals

#### Safe and Convenient

No need for organic reagent, storage at room temperature and validity for 12 months

### MAGNETIC BEADS METHOD

### ORDERING INFORMATION

Cat.No	Method	Specification	Sample Type	Test Item
T201H	Magnetic Beads method	20T/Kit (Pre-filled) 5T/Plate × 4plates	Amniotic fluid	Amniotic Fluid DNA
T321H		20T/Kit (Pre-filled) 1T/Strip×20 strips
